

NITHEESH GOWDA G S

7204546369 | nitheeshsiddegowda543@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Overview

AI and Data Science undergraduate with a strong foundation in Python, SQL, Machine Learning, Data Structures, and Web Technologies. Skilled in developing data-driven applications and implementing machine learning models to solve real-world problems. Quick learner with strong analytical, problem-solving, and communication skills, capable of adapting to new technologies and dynamic work environments. Passionate about continuous learning, innovation, and building scalable solutions while collaborating effectively within teams to deliver impactful results and create long-term value for organizations.

Education

B.E | SDM Institute Of Technology, Ujire | Artificial Intelligence and Data Science | CGPA- **8.59** | 2022-26

12th | Deeksha CFL PU College, Bengaluru | **85.33** | 2020 – 22

10th | Cauvery Public School, Mandya | **85.83** | 2014-20

Technical Skills

Python | SQL | HTML | CSS | Django | Data Structures & Algorithms | Artificial Intelligence | Machine Learning | ML & DL Libraries | JavaScript | Power BI & Tableau | Figma | GitHub | VS Code | Notebook

Projects

Energy Consumption Forecasting and Recommendation Agent | SDMIT | Feb 2025 – Dec 2025

Developed a full-stack AI-powered web application to analyze household energy consumption, forecast future electricity usage using XGBoost, estimate electricity bills, and generate personalized energy-saving recommendations. Built using Django REST Framework, SQLite, Pandas, Scikit-learn, XGBoost, and Recharts.

Technologies used: Python, XGBoost, Django, Data Visualization | [GitHub Link](#)

PDF To Audio Converter | SDMIT | Dec 2024 – Feb 2025

Developed a Python-based application that converts PDF documents into speech using Text-to-Speech (TTS) technology, improving accessibility and user convenience. Implemented efficient file handling and text extraction mechanisms to process PDF content accurately. Optimized the application to handle large documents while ensuring smooth and reliable audio generation.

Technologies used: Python, PyPDF2, Text-to-Speech(TTS) | [GitHub Link](#)

Internship

Python Full-Stack Development Intern | Pentagon Space | Feb 2026 – Present

Gaining hands-on experience in Python, SQL, HTML, CSS, JavaScript, and REST APIs. Building web applications and strengthening problem-solving skills through project-based learning and coding challenges.

Certificates

Artificial Intelligence, Deep Learning, MongoDB, Natural Language Processing, Python, ChatGPT Prompt Engineering, Software Engineering Fundamentals, Google Cloud Project Fundamentals for DevOps, Google Cybersecurity, PostgreSQL. | [Google Drive](#)

Additional Information

Developed multiple academic and personal projects, including Smart Connect (College Management System), IPL Score Predictor, and T20 Match Winner Predictor using machine learning models, strengthening my skills in software development and predictive analytics. Represented my college cricket team at the VTU-level tournament, showcasing teamwork, commitment, and leadership. My interests include watching movies and sports, playing cricket and basketball, and travelling. Fluent in English and Kannada.
